EXPERIENCE

Select Media, Tel Aviv (Remote) — Front End Developer

Sept 2021 - Sept 2022

Built from scratch the company's platform and dashboard using Svelte, Vite, Typescript, TailwindCss, and Material UI.

Use OOP with dependency injection to create project wide API and configuration controllers.

Manage innovation projects for the company with Javascript, html, css, and nodejs.

Participate in code review to ensure readable code and improve the coding skills of the team with Git and Bitbucket.

Tech stack: Svelte, Typescript, GraphQL, Firebase, git, TailwindCSS, Material UI, Object Oriented Programming, Git.

Tech Marketing, Tel Aviv — Full Stack Developer

Sep 2020 - Sep 2021

Built landing pages for national communications provider companies using Html, Sass and webpack based on designer images and zeplin projects.

Manage clients websites and platforms front and backend using wordpress, react, javascript, jquery, html, css, nodejs, php, webpack.

Tech stack: HTML, CSS, Sass, Javascript, Webpack, Php, React, Wordpress, Node.js, git.

Sentinel 7, Tel Aviv — Full Stack Developer

Dec 2019 - Jul 2020

Developed the front end for a startup with a social impact mission: Used React, ES6, mongoDB, Firebase and git to build a platform that queried information about the caregivers from multiple government API's and displayed it to help parents be comfortable registering their children.

Development for the project used agile methodology.

Tech Stack: Javascript (ES6), Html, Css, React, MongoDB, Firebase, Git.
